PART II TEACHING PLAN

Introduction

ATTENTION: Good Afternoon. Glad to see all of you are here again and ready to learn more military drill.

MOTIVATION: As I stated last week, two of you would be selected to act as guidon bearers/guides for the two flights. The selected individuals are _____ and _____. I certainly hope that they read the “rules of the guide” this past week.

OVERVIEW: During our drill period today, you will be practicing all phases of flight drill with the inclusion of a guide/guidon bearer.

TRANSITION: FALL IN!

Body

MP 1 The instructor will issue the two guides a guidon staff and assign the cadets to their respective flights.

Appointed flight commanders will drill their flights, using appropriate movements listed below, for the remainder of the period. Flight leaders must remain in a position relative to the flight so that they can observe all members and maintain control. Corrections will be made by supervisory personnel where needed.

Conclusion

SUMMARY: During the period today, you have drilled as a flight with the addition of a guide.

REMOTIVATION: The addition of a guide to flight drill adds a little flair to what might be rather dull basic drill. The independent moves required of a guide highlight that person's position. Have you paid attention to the moves required of your flight commander? He, also, is highlighted by the sharpness of his movements.

CLOSURE: FALL OUT!
